

WIDE WRITE HEAD WITH THERMAL ASPERITY DETECTOR AND METHOD OF USING THE SAME

Abstract of the Disclosure

- 5 A system for detecting thermal asperities and magnetic defects on a disc. The system includes a wide write head and a certification head. The wide write head includes a thermal asperity detector and a write element. A method for detecting thermal asperities and magnetic defects comprising writing a track with the wide write head, reading defects with the certification head, and scanning for thermal asperities with
10 the thermal asperity detector. A burst pattern can be written to the disc upon locating a asperity of defect.
